BREXIT AND BORIS JOHNSON

CLIENT NAME: The Mail on Sunday

FIELDWORK DATES: 25th – 27th July 2019

METHODOLOGY: Online

POPULATION SAMPLED: All GB adults aged 18+

SAMPLE SIZE: 2,001

SURVEY DESIGN: Quota based selection from
online panels, controlling for:

WEIGHTING: Demographic

- Gender
- Age
- Social class
- Region

- Gender
- Age
- Educational attainment
- Work status
- Region
- 2017 General Election vote

Recall of 2017 GE Vote

Recall of EU referendum

Political attention

DELTAPOLL

DATA WEIGHTING

- For each poll, a nationally representative sample is selected in proportion to population distribution from an online panel.
- Data is rim-weighted to a matrix of geo-demographic variables. Weighting targets are sourced from various locations, including Census 2010 updated to mid-year population estimates, British Election Study and the National Readership Survey.
- Recall of 2017 vote. Any poll that includes the vote intentions suite of questions is weighted back to the actual 2017 result, making allowance for non-voting, don't know and refusal.
- Recall of 2016 EU referendum vote. Any poll that includes the vote intention suite of questions is also weighted back to the actual 2016 result, making allowance for non-voting, don't know and refusal.
- Political Interest. Any poll that includes the vote intention suite of questions is weighted to high, medium and low strength in line with the latest British Election Survey data.

OTHER RELEVANT ISSUES

- The full results tables show the actual question wording used for each question, in the order in which they were asked, and all response options.
- Base sizes are shown on each table. All questions are based on all respondents unless otherwise stated.
- Further enquiries should be sent to info@deltapoll.co.uk
- Deltapoll abides by the Market Research Society Code of Conduct, and by the British Polling Council rules, <http://www.britishpollingcouncil.org/>
- All polls are subject to a wide range of potential sources of error. On the basis of the historical record of the polls at recent general elections, there is a 9 in 10 chance that the true value of a party's support lies within 4 points of the estimates provided by this poll, and a 2 in 3 chance that they lie within 2 points.
