Currently, to qualify for free school meals at primary school, a household has to earn less than £7,400 a year. It has been suggested by some that this amount should be raised so that all households earning less than the national living wage (£19,305) should qualify for free school meals. Others argue that all primary school children should be given free school meals. Which of the following comes closest to your own view?

Free school meals should not be provided for any primary school children	6	7	5	8	9	8	1	3	9	7	2

The voting system currently used to elect MPs to the House of Commons is called First Past the Post. First Past the Post is usually more likely to provide an overall majority of seats to a single party in the House of Commons, and avoids a hung Parliament or a coalition government. Some people instead suggest that we should change the electoral system to proportional representation. Proportional representation systems instead make it more likely that the number of seats a party wins more closely reflect the share of the vote they received. Which voting system would you prefer for electing MPs to the House of Commons?
